

Regression Problem

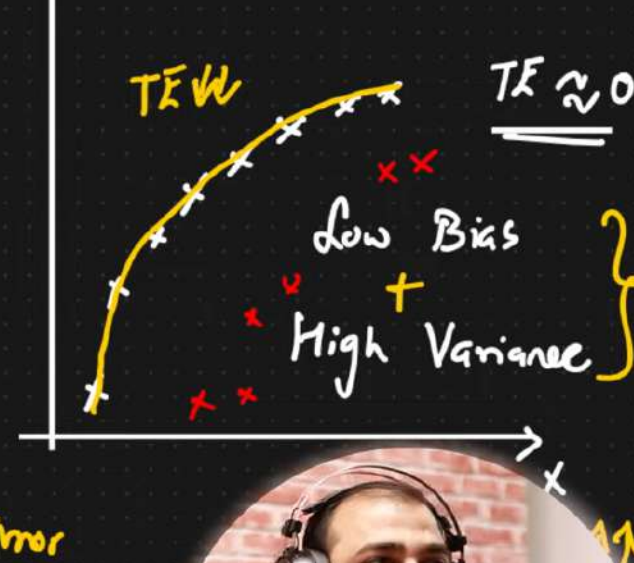

Bias $\rightarrow$ Training Data
 Variance $\rightarrow$ Test Data

$x \rightarrow$ Test Data

Overfitting problem

CLASSIFICATION Problem

Model 1

Training Error = 2%

Test Error = 25%

Overfitting

Low Bias

+

High Variance

Model 2

Train Err = 25%

Test Error = 26%

Underfitting

High Bias

+

High Variance

Model 3

Train Err < 10%

Test Error < 10%

Generalized Model

Low Bias

+

Low Variance
