# Statistics

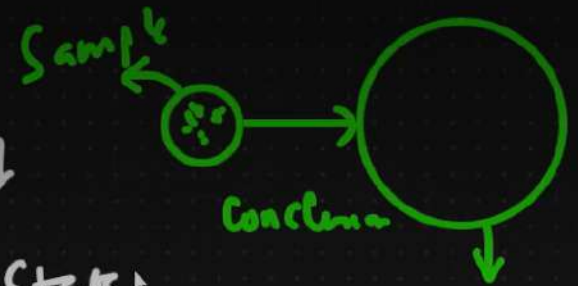

Descriptive Stats

Defn: It consists of organizing and summarizing of data

Inferential Stats

It consists of using data you have measure to form conclusions

Defn: It consists of  
organizing and summarizing  
of data (Mean, Median, Mode)

- ① Measure Central Tendency
- ② Measure of Dispersion (Variance & std)
- ③ Different type of Dist of data
- ④ Histograms, pdf, pmf

It consists of using data you have  
measured to form conclusions

- ① Z-test
- ② t-test
- ③ Chi-square
- ④ ANOVA

Hypothesis Testing  
 $H_0, H_1$   
p value, significance  
value

9:13 / 15:31
