

Normal Distribution / Gaussian Distribution

x

68-95-99.7 [Empirical Rule]
[3-Sigma Rule]

$$\{ \rightarrow \frac{68-95-90}{\dots} = \dots$$

① Symmetrical =

$X = \{ 1, 2, \dots \}$

$\Downarrow$ 100 elements

$\Downarrow$ Gaussian Distribution

① Symmetrical

$X = \{ 1, 2, \dots \}$

↓ 100 elements

⇒ 68 elements

Gaussian Distribution

→ 68-95-99.7 [Empirical Rule]
[3-Sigma Rule]
